

# Birmingham City Council Audit Committee

21 February 2024

---

**Subject:** Management response to External Audit Value for Money report in relation to the implementation of Oracle

## Commissioner Review

Commissioners welcome the aims and ambition of the Council to manage the recommendations in this report, however in the recent past the Council has not demonstrated the ability and capability to deliver on such aims. Commissioners will want updates as the Council works to deliver these recommendations, to ensure that the Council sets out the missing details from this report. These responses will need to be turned into a more detailed action programme with target dates and responsible officers. Oracle recovery is one of the fundamental elements of the required Improvement Plan and will be reported via the Improvement and Recovery Board.
