

## Appendix B – Schemes in development by constituency

The table gives an overview of project identification and development activity by constituency.

Note that MHCLG have advised that they will be issuing further detail on how the Fund will operate from 2022-23 onwards which will be set out later this year. Outline schemes identified for possible submission for future bidding rounds will have to be reassessed against any additional guidance issued by MHCLG. Early project identification work will also need to consider the potential for schemes generating additional revenue cost pressures arising from maintenance requirements etc.
