Socio-economic impacts	
Please indicate any actions arising from completing this screening exercise.	This Equalities Assessment reviews the Annual Programme Update (APU) for the Transportation and Highways Capital Programme (THCP) for the period 2021/22 to 2026/27 at a total estimated

cost of £237.601m . The THCP supports delivery of the City Council's key policies and priorities, facilitating streamlined and efficient delivery. The APU reflects new resources, revised project costings and programmes, expenditure profiles and policy changes that have occurred since approval of the previous THCP on 11th February 2020. Within this update, approval is sought to allocate new Integrated Transport Block (ITB) capital funding, available through the West Midlands Combined Authority (WMCA) devolved transport grant process (£5.145m in 2021/22), to support a range of projects and programmes that contribute towards key City Council priorities and delivery plan.

The THCP contributes to the delivery of priorities including the West Midlands Strategic Transport Plan: Movement for Growth, Birmingham Development Plan, Birmingham Connected transport strategy and the emerging Birmingham Transport Plan (BTP), the Route to Zero strategy, and to allow the City Council to fulfil its obligations as Host City for the 2022 Commonwealth Games (CWG). These policy documents and associated reports have already been subject to equalities analysis.

This EA also reviews the request to seeks approval to release development funding of £6.711m Integrated Transport Block (ITB), to progress individual projects to Outline Business Case (OBC) or Full Business Case (FBC) stage in accordance with the City Council's Gateway and Related Financial Approval Framework (GRFAF) and the delegations proposed within this report, to expedite project delivery and enable a rapid response to emerging grant funding opportunities.

The intended outcomes of the THCP include:

- . supporting economic growth,
- . reducing congestion,
- . increasing active travel,
- . improving physical fitness and health,
- . improving road safety, improving accessibility,
- . improving air quality, and
- . maintaining and improving the integrity of the highway network.

Transportation and highway improvements will benefit all districts and wards across the city, with further benefits to visitors and those who commute into the city. Measures implemented will benefit all ages and communities across the city. Many schemes are prioritised in terms of need, in addition to detailed data analysis, consultation and

reference to existing Council, Transport for West Midlands, Department for Transport and other guidance or policy. Schemes will cover a broad spectrum of modes including public transport, walking, cycling, freight / business movement and the private car.

This EA is an update of EQUA414: Updated Transportation and Highways Capital Funding Strategy 2020/21 to 2025/26.

Please indicate whether a full impact assessment is recommended

NO

What data has been collected to facilitate the assessment of this policy/proposal?

Consultation analysis

Adverse impact on any people with protected characteristics.

Could the policy/proposal be modified to reduce or eliminate any adverse impact?

How will the effect(s) of this policy/proposal on equality be monitored?

What data is required in the future?

Are there any adverse impacts on any particular group(s)

No

If yes, please explain your reasons for going ahead.

Initial equality impact assessment of your proposal

Consulted People or Groups

Informed People or Groups

Summary and evidence of findings from your EIA

All schemes proposed within the THCP are provided as a 'public good' and are available for all members of the community and visitors alike to use. Transport proposals are supported by promotional and educational training provided by the **Travel Demand Management** Team within Transport and Connectivity, particularly in relation to road safety and active travel. Individual schemes will be subject to further screening for equalities analysis.

It is considered that there are no aspects of the THCP that could contribute to inequality. The facilities and measures proposed are for all users and none are excluded. No measures are considered to discriminate against protected groups in terms of age, race, gender reassignment, sexual orientation, sex, pregnancy or maternity, disability, marriage / civil partnership or religion / belief.

Internal consultation has been undertaken with the Director Inclusive Growth, Assistant Director Highways, Assistant Director Planning, Assistant Director Development and the Assistant Director Transport and Connectivity.

Full external consultation will be undertaken with all relevant stakeholders as part of individual Options Appraisals and FBCs, in accordance with normal practise including ward councillors, residents, emergency services, businesses, the West Midlands Combined Authority (WMCA) / Transport for West Midlands and the Cycling Forum. All members of the local community, including groups of people whose first language is not English, will be invited to comment on the proposals during the public consultations. All proposals will be designed in accordance with national design standards,

which give consideration to the needs of disabled people; helping to promote positive attitudes towards disabled people. Consultation will also be undertaken with Sutton Town Council and Frankley Parish Council where appropriate.

Individual scheme proposals will be further screened for equalities analysis as part of standard Council governance and approval processes, and EA's will be completed at Options Appraisal and FBC stage for individual projects and programmes.
