## FUTURE PARKS ACCELERATOR/ NATURALLY BIRMINGHAM ON A PAGE

# Appendix 5.

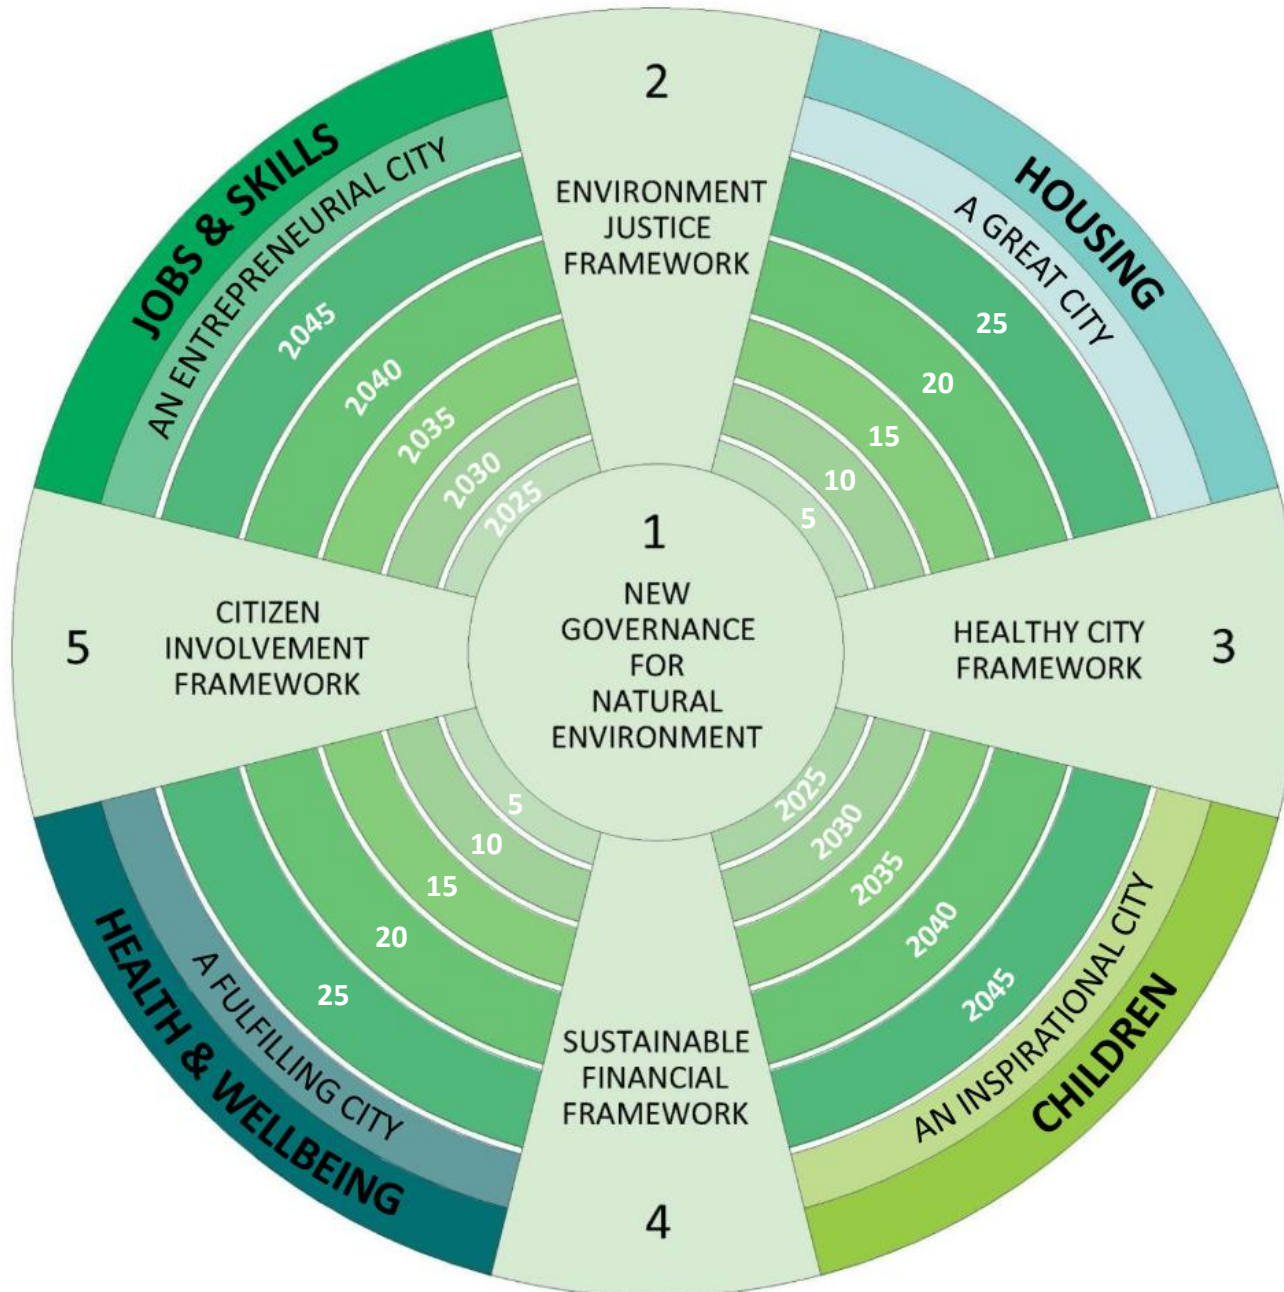

## BID-FLOW DIAGRAM 2, POLICY & ALIGNMENT PHASE – A ROADMAP

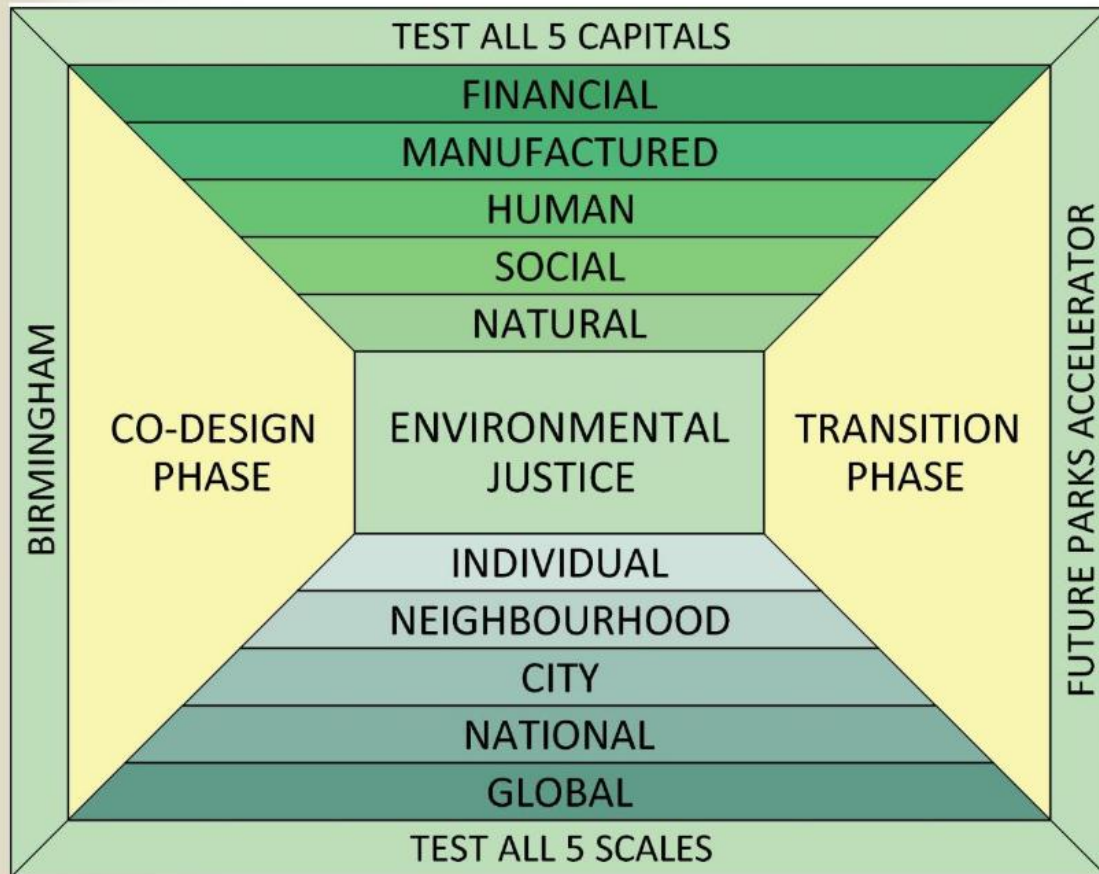

UK Government's Natural Capital Committee Third Report's Figure 1 adopted and modified to show Naturally Birmingham's Mission' for Natural Environment Justice

The over-riding aim of Naturally Birmingham is to address Environmental Justice; this is expressed in the diagram below:-

### Summary of the 5 capitals

**Financial capital** – represented by currency value and corporate and reputational risk;

**Manufactured capital** – values infrastructure, assets, the built environment and digital technologies;

**Human capital** – values skills, knowledge, education, creativity and all forms of health and wellbeing;

**Social capital** – values culture, community cohesion, communications, institutions, schools and governance;

**Natural capital** – values all natural resources and processes

NOTE: GDP primarily focusses on Economy and Manufactured; inclusive growth and sustainability must address all 5.

**Environmental Justice** will be tested through policy and practice at 5 scales and its effectiveness will be valued through the 5 capitals.

The project is divided into two steps with the exploratory work happening in the co-design phase; and the translation of the findings into new policy or revisions and a corporate systems-change, through the transition phase.

We will seek to create **'Integration Champions'** within key council departments through clause changes to pilot leads job descriptions. We will also ensure our external partners similarly adopt the notion of **'Integration Champions'** to embed change over time. This will significantly increase the reach of the green space agenda across the organisation- so helping to grow organisational capacity over time.

Politically this will also align each Cabinet Portfolio with the green space agenda. So locking in this new governance model.
