Lead Member:	Cllr Majid Mahmood
Inquiry Members:	Cllrs Mohammed Aikhlaq, Sue Anderson, Albert Bore, Maureen Cornish, Andrew Hardie, Mohammed Idrees, Karen McCarthy, Eva Phillips, Robert Pocock, Sharon Thompson, Margaret Waddington.
Officer Support:	Rose Kiely, Group Overview and Scrutiny Manager Gail Sadler, Research and Policy Officer

Key question:	How can the increasing prevalence of diabetes in Birmingham be managed and reduced?
Key lines of enquiry:	<ul style="list-style-type: none">• How prevalent is diabetes in Birmingham and do rates vary in different parts of the city or between different communities?• How do these rates compare to the rest of the country?• What is the current trend in the number of people with diabetes in the city?• What is the difference between Type 1 and Type 2 diabetes?• What are the main risk factors for developing diabetes and how can these be reduced?• What are the potential long-term health implications?• What are the potential long-term financial implications?• What is being done in the city to identify those most at risk and prevent them developing diabetes where possible?• Is there evidence about what interventions work to prevent people developing diabetes and if so, what does the evidence show?• What is being done in the city in relation to diabetes management to reduce the risk of complications for those who already have diabetes?• What models of good practice exist in the city and elsewhere?• What are the potential barriers to these models being implemented widely in the city?• How could good practice examples be replicated or enhanced?

Prevention and Management of

Diabetes in Birmingham

Anticipated outcomes:	<ul style="list-style-type: none"> • To develop a clear understanding of who is most at risk and what interventions work to prevent people from developing diabetes. • To produce recommendations that will support the widespread implementation of good practice in the city through prevention and good diabetes management.
