

Appendix 1

Accounting Policies 2020/21 – First Draft

Note 1

Accounting Policies

i. General Principles

The Statement of Accounts summarises the Council's transactions for the 2020/21 financial year and its position at the year-end of 31 March 2021. The Accounts and Audit Regulations 2015 require the Council to prepare an annual statement of accounts in accordance with proper accounting practices. These practices primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2020/21 (the Code) supported by International Financial Reporting Standards (IFRS).

The accounting convention adopted in the statement of accounts is principally historical cost, modified by the revaluation of certain categorised non-current assets and financial instruments. Historical cost is deemed to be the carrying amount of an asset as at 1 April 2007 (that is, brought forward from 31 March 2007) or at the date of acquisition, whichever date is the later, and if applicable is adjusted for subsequent depreciation or impairment.

ii. Accruals of Income and Expenditure

Service activity is accounted for in the year it takes place, not simply when cash payments are made or received. In particular:

- Revenue from the provision of services is recognised when the Council can reliably measure the percentage of completion of the transaction and it is probable that economic benefits or service potential associated with the transaction will flow to the Council;
- Revenue from the sale of goods or provision of services satisfied over time is recognised if the Council can reasonably measure its progress towards complete satisfaction of the performance obligation;
- Supplies are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption, they are carried as inventories on the Balance Sheet, for example, fuel and transport parts;
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made;
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract;
- When income and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected.

iii. Fair Value Measurement

The Council measures some of its non-financial assets, such as surplus and investment properties, and some of its financial instruments, such as equity shareholdings, at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The Council measures the fair value of an asset or liability using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

When measuring the fair value of a non-financial asset, the Council takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Council uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Inputs to the valuation techniques in respect of assets and liabilities for which fair value is measured or disclosed in the Council's financial statements are categorised with the fair value hierarchy as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities that the Council can access at the measurement date;
- Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly;
- Level 3 – unobservable inputs for the asset or liability.

iv. Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, that is, in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, or events and conditions, on the Council's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

v. Employee Benefits

Benefits Payable During Employment

Short Term Benefits

Short term employee benefits are those due to be settled within 12 months of the year-end. They include benefits such as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits, for example cars for current employees, and are recognised as an expense for services in the year in which employees render service to the Council. An accrual is made for the cost of annual leave entitlements (or any other form of leave, for example time off in lieu) earned by employees but not taken before the year-end, which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to the Surplus/Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that leave benefits are charged to revenue in the financial year in which the leave of absence occurs.

Other Long Term Benefits

Other long term employee benefits are benefits, other than post-employment and termination benefits, that are not expected to be settled in full before 12 months after the end of the annual reporting period for which employees have rendered the related service. Within local authorities the value of these benefits are not expected to be significant. Such long term benefits may include:

- Long term paid absence or sabbatical leave;
- Long term disability benefits;
- Bonuses;
- Deferred remuneration.

Long term benefits would be accounted for on a similar basis to post-employment benefits.

Termination Benefits

Termination benefits are amounts payable as a result of a decision by the Council to terminate an employee's employment before the normal retirement date or an officer's decision to accept voluntary redundancy and are charged on an accruals basis to the appropriate Directorate at the earlier of when the Council can no longer withdraw the offer of those benefits or when the Council recognises costs for a restructuring.

Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund and Housing Revenue Account balances to be charged with the amount payable by the Council to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards.

In the Movement in Reserves Statement, appropriations are required to and from the Pension Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

Post-Employment Benefits

Employees of the Council are members of one of three separate pension schemes:

- The Local Government Pension Scheme, administered by the West Midlands Pension Fund offices at Wolverhampton City Council;
- The Teachers' Pension Scheme administered by Capita Teachers' Pensions on behalf of the Department for Education;
- The NHS Pensions Scheme, administered by NHS Pensions.

Each scheme provides defined benefits to members (retirement lump sums and pensions), earned during employment with the Council.

The arrangements for the Teachers' Pension Scheme and the NHS Pensions Scheme mean liabilities for these benefits cannot ordinarily be identified specifically to the Council. These schemes are, therefore, accounted for as if they were defined contribution schemes and no liability for future payments of benefits is recognised in the Balance Sheet.

The Local Government Pension Scheme

The Local Government Pension Scheme is accounted for as a defined benefits scheme:

- The liabilities of the West Midlands Local Government Pension Fund attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method – that is, an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc., and projections of earnings for current employees;
- Liabilities are discounted to their value at current prices, using a discount rate of X.XX% based on the indicative rate of return on high quality corporate bond yields;
- The assets of the West Midlands Local Government Pension Fund attributable to the Council are included in the Balance Sheet at their fair value:
 - quoted securities – current bid price;
 - unquoted securities – professional estimate;
 - unitised securities – current bid price;
 - property – market value.
- The change in the net pensions liability is analysed into the following elements:

Service cost comprising:

- current service cost – the increase in liabilities as a result of years of service earned this year – allocated in the Comprehensive Income and Expenditure Statement to the Directorates for which the employees worked;
- ⊖ past service cost – the increase in liabilities arising from current year decisions whose effect related to years of service earned in earlier years – debited to the Surplus/Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement;
- net interest on the net defined benefit liability/(asset), that is the net interest expense for the Council – the change during the reporting period in the net defined benefit liability/(asset) that arises from the passage of time charged to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement – this is calculated by

applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability/(asset) at the beginning of the period – taking into account any changes in the net defined benefit liability/(asset) during the period as a result of contribution and benefit payments.

Re-measurements comprising:

- the return on plan assets – excluding amounts included in net interest on the net defined benefit liability/(asset) – charged to the Pensions Reserve as Other Comprehensive Income and Expenditure;
- actuarial gains and losses – changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions – charged to the Pensions Reserve as Other Comprehensive Income and Expenditure.

Contributions paid to the West Midlands Local Government Pension Fund:

- cash paid as employer's contributions to the pension fund; not accounted for as an expense.

In relation to retirement benefits, statutory provisions require the General Fund and Housing Revenue Account balances to be charged with the amount payable by the Council to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are transfers to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and pensioners, and any such amounts payable but unpaid at the year-end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund and Housing Revenue Account arising from the requirement to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

Discretionary Benefits

The Council has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff, including teachers and public health employees, are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

vi. Revenue Expenditure Funded from Capital under Statute

Expenditure incurred during the year that may be capitalised under statutory provisions but which does not result in the creation of a non-current asset, has been charged as expenditure to the relevant Directorate in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer through the Movement in Reserves Statement from the General Fund Balance to the Capital Adjustment Account then reverses out the amounts charged so that there is no impact on the level of Council Tax.

vii. Charges to Revenue for Non-Current Assets

Directorates and trading accounts are debited with the following amounts to record the cost of holding non-current assets during the year:

- Depreciation attributable to the assets used by the relevant service;
- Revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off;
- Amortisation of intangible non-current assets attributable to the service.

The Council is not required to raise Council Tax to fund depreciation, revaluation and impairment losses or amortisation. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement equal to an amount calculated on a prudent basis determined by the Council in accordance with statutory guidance. An adjustment is, therefore, made to remove depreciation, amortisation and revaluation and impairment losses from the General Fund and Housing Revenue Account through Note XX, Adjustments Between Accounting Basis and Funding Basis under Regulations, and the Movement in Reserves Statement and to replace them by the statutory contribution from the General Fund or Housing Revenue Account Balance to the Capital Adjustment Account.

viii. Government Grants and Contributions

Government grants, third party contributions and donations are recognised as due to the Council when there is assurance that:

- the Council will comply with the conditions attached to the payments; and
- the grants or contributions will be received.

Amounts recognised as due to the Council are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution are satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset in the form of the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions are unlikely to be satisfied are carried in the Balance Sheet as creditors. Where conditions are satisfied or expected to be satisfied, the grant or contribution is credited to the relevant Directorate (attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income (non-ring fenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied Reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied Reserve are transferred to the Capital Adjustment Account as they are applied to fund capital expenditure.

ix. Overheads and Support Services

The costs of overheads and support services are charged to Directorates in accordance with the Council's arrangements for accountability and performance.

x. Property, Plant and Equipment sent to Liz to review

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment.

Recognition

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided it is probable that the future economic benefits or service potential associated with the item will flow to the Council and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (for example, repairs and maintenance) is charged as an expense when it is incurred.

Measurement

Assets are initially measured at cost, comprising:

- the purchase price;
- any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The Council capitalises borrowing costs incurred whilst material assets are under construction. Material assets are considered to be those where total planned (multi-year) borrowing for a single asset (including land and building components) exceeds £20m, and where there is a 'substantial period of time' from the first capital expenditure financed from borrowing until the asset is ready to be brought into use. A substantial period of time is considered to mean in excess of two years. Both of these tests will be determined using estimated figures at the time of preparing the accounts in the first year of capitalisation. Should either test fail in subsequent financial years, the prior year's treatment will not be adjusted retrospectively.

The cost of assets acquired other than by purchase is deemed to be its fair value, unless the acquisition does not have commercial substance (that is, it will not lead to a variation in the cash flows of the Council). In the latter case, where an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Council.

Assets are subsequently carried in the Balance Sheet using the following measurement bases:

- infrastructure assets, vehicles, plant, furniture and equipment (excluding Tyseley Energy Recovery Facility) – depreciated historical cost;
- community assets and assets under construction – historical cost;
- dwellings – current value, determined using the basis of existing use value for social housing (EUV-SH);

- where cleared land has been designated for social housing use, that land is valued using the basis of EUV-SH;
- surplus assets – fair value; assessed in their highest and best use
- all other assets – current value, determined as the price that would be received to sell an asset in its existing use. Where there is no market based evidence of current value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of current value.

Assets included in the Balance Sheet at current value are revalued sufficiently regularly to ensure their carrying amount is not materially different from their current value at the year-end, but as a minimum every five years. Increases in asset valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account. Upon revaluation, where the current value of a property has been assessed by the valuer as being below £50k, the Council applies a de minimis approach and determines the asset as having a nil current value on the basis of materiality.

Impairment

Assets are assessed at each year-end for any indication that an asset may be impaired. Where indications exist and any possible difference is estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where revaluation and impairment losses are identified, and where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the reduction in value is charged against that balance until it is used up. Thereafter, or if there is no balance of revaluation gains, the loss is charged against the relevant Directorate in the Comprehensive Income and Expenditure Statement.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant Directorate in the Comprehensive Income and Expenditure Statement, up to the amount of the original loss, adjusted for the depreciation that would have been charged if the loss had not been recognised.

Useful Life

The Council estimates that assets, at new, have remaining useful lives within the parameters as detailed below:

- Council Dwellings – separated into the key components
 - Land – indefinite life;
 - Kitchens – 20 years;
 - Bathrooms – 40 years;
 - Doors/Windows/Rainwater, Soffits and Facias – 35 years;
 - Central Heating/Boilers – 15 to 30 years;
 - Roofs – 25 to 60 years;
 - Remaining components (Host) – 30 to 60 years;
- Buildings – up to 50 years;
- Vehicles, Plant, Furniture and Equipment – up to 50 years;
- Infrastructure – up to 40 years.

The useful life of each relevant asset is reviewed as part of the Council's five year cycle of revaluation by an appropriately qualified valuer.

Where a school is proposing to transfer to Academy School Trust status after the year end, the Council maintains the useful life of the school's assets on the basis of the last valuation undertaken.

Depreciation

Depreciation is provided for on all Property, Plant and Equipment assets, including components, by the systematic straight line allocation of their depreciable amounts over their useful lives. Assets without a determinable finite useful life, and assets that are not yet available for use, are not depreciated. Depreciation is charged in the year of disposal but not charged in the year of purchase.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Componentisation

Where an asset is material (over £5m) and has major components whose cost is significant to the total cost of the asset, and which have markedly different useful lives, components are separately identified and depreciated. Also, additions are considered for components, whereby as components are added, any component being replaced is derecognised. Where the historical cost of the old component is not readily determinable, it has been estimated by comparing the remaining useful economic life of the component to the original useful economic life and the cost of the replacement component. A pro rata of both the depreciation and any applicable Revaluation Reserve is also derecognised.

Disposals and Non-Current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and carrying value less the cost of sale. Where there is a subsequent decrease to carrying value less the cost of sale, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in current value are recognised only up to the amount of any previous losses recognised in the Surplus/Deficit on Provision of Services. Depreciation is not charged on Assets Held for Sale.

Where assets are no longer used by a Directorate, these assets are offered to other Directorates for use. Those assets which are surplus are made available for sale and will be classified as Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale, adjusted for depreciation or revaluations that would have been recognised had they not been classified as held for sale, and their recoverable amount at the date of the decision to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale.

When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet and the gain or loss on disposal is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account. Gains and losses on disposal of assets are not a charge against Council Tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund Balance through the Movement in Reserves Statement.

Amounts, in excess of £10,000, received from a disposal are categorised as capital receipts. A proportion of receipts relating to housing disposals (for 2020/21, X% of the receipt net of statutory deductions and allowances) is payable to the Government. The balance of receipts is required to be credited to the Capital Receipts Reserve. Receipts are appropriated to the Reserve from the General Fund Balance through the Movement in Reserves Statement.

xi. Heritage Assets

Heritage assets are assets that have historical, artistic, scientific, technological, geographical or environmental qualities that are held in trust for future generations because of their cultural, environmental or historical associations and contribution to knowledge and culture. They include museums' and libraries' heritage collections, historic buildings and the historical environment, public works of art and civic regalia and plate.

Where assets of a heritage nature are used in the ongoing delivery of the Council's services, such as historically interesting buildings and parks and open space, they have not been categorised as heritage assets but remain as other land and buildings or as community assets within Property, Plant and Equipment.

For the Museum, Library and Civic Plate Collections, insurance valuations are used due to the unique nature, diversity and quantity of the assets, and lack of historical cost information. For other types of Heritage Assets, historical cost information is used where available when compiling the balance sheet. In some cases, neither reliable valuation information nor historical cost information is available, in which case the asset has been excluded from the balance sheet.

The Council considers that heritage assets will have indeterminate lives and a high residual value; and therefore does not consider it appropriate to charge depreciation on the assets. Any impairment or disposal of heritage assets is recognised and measured in accordance with the Council's relevant policies (see section xi. Property, Plant and Equipment in this note).

xii. Intangible Assets

Expenditure on non-monetary assets that do not have physical substance but are controlled by the Council as a result of past events (for example, software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Council.

Expenditure on the development of websites is not capitalised if the website is solely or primarily intended to promote or advertise the Council's goods or services.

Intangible assets are measured initially at cost and the depreciable amount is amortised over the useful life of the asset on a straight-line basis and charges to the relevant Directorate in the Comprehensive Income and Expenditure Statement.

Where expenditure on intangible assets qualifies as capital expenditure for statutory purposes, amortisation, impairment losses and disposal gains and losses are not permitted to have an impact on the General Fund balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account.

xiii. Investment Properties

Investment properties are those that are held by the Council solely to earn rentals and/or for capital appreciation. An asset does not meet the definition of being an investment property if it is used in any way to facilitate the delivery of services, for the production of goods or is held for sale.

Investment properties are measured initially at cost and subsequently carried at fair value, measured at highest and best use. Investment properties are not depreciated but are revalued annually based on market conditions at the year-end. Gains/losses on revaluation, or on disposal, are posted to Financing Income and Expenditure in the Comprehensive Income and Expenditure Statement.

Rentals received in relation to investment properties are credited to Financing Investment Income in the Comprehensive Income and Expenditure Statement and result in a gain for the General Fund Balance. However, revaluation and disposal gains/losses are not permitted by statutory arrangements on the General Fund Balance and are therefore reversed out through the Movement in Reserves Statement and posted to the Capital Adjustment Account.

Whilst discharging its role the Council works to ensure that the stewardship of all property assets is such that they are managed in a way that is economic, efficient and effective. The Council has a site that meets the definition of 'Investment Properties'.

The Council has a number of lease arrangements with subsidiary companies that are not treated as investment properties in line with IAS 40, Investment Property.

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment.

xiv. Service Concession Arrangements

Service concession arrangements (formerly classed as PFI and similar contracts) are agreements to receive services, where the responsibility for making available the property, plant and equipment needed to provide the services passes to the contractor. As the Council is deemed to control the services that are provided under the arrangement, and as ownership of the property, plant and equipment will pass to the Council at the end of the contracts for no additional charge, the Council carries the assets used under the contracts on its Balance Sheet as part of Property, Plant and Equipment.

The original recognition of these assets at fair value (based on the cost to purchase the property, plant and equipment) is balanced by the recognition of a liability for amounts due to the scheme operator to pay for the capital investment. The Council includes the cost of establishing Special Purpose Vehicles in the calculation of the liabilities.

Non-current assets recognised on the Balance Sheet are revalued and depreciated in the same way as property, plant and equipment owned by the Council.

The amounts payable to the contractor each year are analysed into five elements:

- Fair value of the services procured during the year – debited to the relevant Directorate in the Comprehensive Income and Expenditure Statement;
- Finance cost – an interest charge on the outstanding Balance Sheet liability, debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement;
- Contingent rent – inflationary increases in the amount to be paid for the property arising during the contract, debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement;
- Payment towards liability – applied to write down the Balance Sheet liability towards the contractor;
- Lifecycle replacement costs – usually recognised as an addition to Property, Plant and Equipment when the relevant works are carried out in line with the operator's model spending profiles.

xv. Leases

Leases are classified as either finance or operating leases at the inception of the lease. Classification as a finance lease occurs where the terms of the lease transfer substantially all the risks and rewards incidental to the ownership of the asset from lessor to lessee and where the lease term is for the major part of the economic life of the asset in question, whether or not title is eventually transferred. Those leases not classified as finance leases are deemed to be operating leases.

Where a lease covers both land and buildings, the land and buildings elements are considered separately for classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

The Council as Lessee

Finance Leases

Property, plant or equipment held under a finance lease is recognised on the Balance Sheet at the commencement of the lease at its fair value measured at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Initial direct costs of the Council are added to the carrying amount of the asset. Premia paid on entry into a lease are applied to writing

down the lease liability. Contingent rents are charged as expenses in the periods in which they are incurred. Property, Plant and Equipment recognised under finance leases are accounted for using the policies generally applied to such assets (see section xi above).

Lease payments are apportioned between:

- A charge for the acquisition of the interest in the property, plant or equipment – applied to write down the lease liability; and
- A finance charge – debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

The Council is not required to raise Council Tax to cover depreciation or revaluation and impairment losses arising on leased assets. Instead, a prudent annual contribution is made from revenue funds towards the deemed capital investment in accordance with statutory requirements. Depreciation and revaluation and impairment losses are therefore substituted by a revenue contribution in the General Fund balance, by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

Operating Leases

Rentals paid under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the Directorate benefiting from use of the leased property, plant or equipment. Charges are made on a straight line basis over the life of the lease, even if this does not match the pattern of payments.

The Council as Lessor

Finance Leases

Where the Council grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset in the Balance Sheet is written off to Other Operating Expenditure in the Comprehensive Income and Expenditure Statement as part of the gain/loss on disposal. A gain, representing the Council's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain/loss on disposal, matched by a lease (long term debtor) asset in the Balance Sheet

Lease rentals receivable are apportioned between:

- A charge for the acquisition of the interest in the property – applied to write down the lease debtor; and
- Finance income - credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is not permitted by statute to impact the General Fund Balance and is required to be treated as a capital receipt. Where a premium has been received, this is posted out of the General Fund Balance to the Capital Receipts Reserve through the Movement in Reserves Statement. Where the amount due in relation to the lease asset is settled by the payment of rentals in future financial years, this is posted out of the General Fund Balance to the Deferred Capital Receipts Reserve through the Movement in Reserves Statement.

Operating Leases

Where the Council grants an operating lease for an asset, it is retained in the Balance Sheet. Rental income is credited to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Credits are made on a straight line basis over the life of the lease, even if this does not match the pattern of payments. Initial direct costs incurred in negotiating and arranging the lease are added to the carrying amount of the relevant asset and charged as an expense over the lease term on the same basis as rental income.

xvi. Interests in Companies and Other Entities

The Council has material interests in companies and other entities that have the nature of subsidiaries, associates and joint operations and proper accounting practices require it to prepare group accounts. In the Council's own single entity accounts, the interests in companies and other entities are recorded as financial assets at cost, less any provision for losses.

xvii. Accounting for Schools

Local authority maintained schools, in line with relevant accounting standards and the Code, are considered to be separate entities with the balance of control lying with the Council. As such the Council should consolidate the activities of schools into its group accounts. However, the Code requires that the income, expenditure, assets and liabilities of maintained schools be accounted for in local authority entity accounts rather than requiring the preparation of group accounts.

The Council has the following types of maintained schools under its control:

- Community schools;
- Voluntary Controlled schools;
- Voluntary Aided schools;
- Foundation schools.

Given the nature of the control of the entities and the control of the service potential from the non-current assets of the maintained schools, the Council has recognised buildings and other non-current assets on its balance sheet. The Council has recognised all land for Community Schools on its balance sheet and recognised that land for Voluntary Aided, Voluntary Controlled and Foundation Schools where it can be demonstrated that the Council has control over the land through restrictive covenants within site deeds or where there is reasonable evidence that restrictive covenants are in place.

Academies and Free Schools are not considered to be controlled by the Council and are not consolidated into the entity or group accounts.

xviii. Financial Instruments

Financial Liabilities

Financial liabilities are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument. They are initially measured at fair value and are carried at their amortised cost. Non-borrowing creditors are carried at contract amount. Annual charges to the Financing and Investment Income and Expenditure line in

the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments to the instrument over the life of the instrument to the amount at which it was originally recognised.

For most of the Council's borrowings, this means the amount presented in the Balance Sheet is the outstanding principal repayable, plus accrued interest; and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year according to the loan agreement.

However, the Birmingham City Council 2030 bonds, issued in exchange for NEC loan stock in 2005 and the NEC Development 2027 bonds, were issued at a fair value in excess of the principal repayable. Interest is being charged on an amortised cost accounting basis, which writes the value down to zero at maturity.

Gains and losses on the repurchase or early settlement of borrowing are credited and debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement in the year of repurchase/settlement.

Where premia and discounts have been charged to the Comprehensive Income and Expenditure Statement, regulations allow the impact on the General Fund balance to be spread over future years. The Council has a policy of spreading the gain or loss over the term that was remaining on the loan against which the premium was repayable or discount received when it was repaid. The reconciliation of amounts charged to the Comprehensive Income and Expenditure Statement to the net charge required against the General Fund balance is managed by a transfer to or from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

Financial Assets

Financial assets are classified based on a classification and measurement approach that reflects the business model for holding the financial assets and their cash flow characteristics. There are three main classes of financial assets measured at:

- amortised cost
- fair value through profit or loss (FVPL), and
- fair value through other comprehensive income (FVOCI). The Council does not currently have any financial assets designated at FVOCI.

The Council's business model is to hold investments to collect contractual cash flows. Financial assets are therefore classified as amortised cost, except for those whose contractual payments are not solely payment of principal and interest (that is, where the cash flows do not take the form of a basic debt instrument).

Financial Assets Measured at Amortised Cost

Financial assets measured at amortised cost are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement (CIES) for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the financial assets held by the Council, this means that the amount

presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the CIES is the amount receivable for the year in the loan agreement.

However, the Council has made a number of loans at less than market rates (soft loans). When soft loans are made, a loss is recorded in the CIES (debited to the appropriate service) for the present value of the interest that will be foregone over the life of the instrument, resulting in a lower amortised cost than the outstanding principal.

Interest is credited to the Financing and Investment Income and Expenditure line in the CIES at a marginally higher effective rate of interest than the rate receivable from the voluntary organisations, with the difference serving to increase the amortised cost of the loan in the Balance Sheet. Statutory provisions require that the impact of soft loans on the General Fund Balance is the interest receivable for the financial year – the reconciliation of amounts debited and credited to the CIES to the net gain required against the General Fund Balance is managed by a transfer to or from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

Any gains and losses that arise on derecognition of an asset are credited or debited to the Financing and Investment Income and Expenditure line in the CIES.

Expected Credit Loss Model

The Council recognises expected credit losses on all of its financial assets held at amortised cost [or where relevant FVOCI], either on a 12-month or lifetime basis. The expected credit loss model also applies to lease receivables and contract assets. Only lifetime losses are recognised for trade receivables (debtors) held by the Council.

Impairment losses are calculated to reflect the expectation that the future cash flows might not take place because the borrower could default on their obligations. Credit risk plays a crucial part in assessing losses. Where risk has increased significantly since an instrument was initially recognised, losses are assessed on a lifetime basis. Where risk has not increased significantly or remains low, losses are assessed on the basis of 12-month expected losses.

Financial Assets Measured at Fair Value through Profit or Loss

Financial assets that are measured at FVPL are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured and carried at fair value. Fair value gains and losses are recognised as they arrive in the Surplus or Deficit on the Provision of Services.

Where it is possible to determine a fair value, measurement of the financial assets is based on the following techniques:

- instruments with quoted market prices – the market price
- other instruments with fixed and determinable payments – discounted cash flow analysis.

The inputs to the measurement techniques are categorised in accordance with the following three levels:

- Level 1 inputs – quoted prices (unadjusted) in active markets for identical assets that the authority Council can access at the measurement date.
- Level 2 inputs – inputs other than quoted prices included within Level 1 that are observable for the asset, either directly or indirectly.

- Level 3 inputs – unobservable inputs for the asset.

Any gains and losses that arise on the derecognition of the asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Instruments Entered Into Before 1 April 2006

The Council has entered into a number of financial guarantees that are not required to be accounted for as financial instruments. These guarantees are reflected in the Statement of Accounts to the extent that provisions might be required or a contingent liability note is needed under the policies set out in the section on Provisions, Contingent Liabilities and Contingent Assets.

xix. Cash and Cash Equivalents

Cash and Cash Equivalents are represented by cash in hand and deposits with financial institutions, which must be repayable immediately without penalty on notice of not more than 24 hours. Any deposits with financial institutions that may be repaid after the immediate day are considered to be investments, not cash equivalents.

In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand, where there are pooling arrangements across the accounts with the same institution, and form an integral part of the Council's cash management.

xx. Provisions, Contingent Liabilities and Contingent Assets

Provisions

Provisions are made where an event has taken place that gives the Council a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. For example, the Council may be involved in a court case that could eventually result in the making of a settlement or the payment of compensation.

Provisions are charged as an expense to the appropriate Directorate in the Comprehensive Income and Expenditure Statement in the year that the Council becomes aware of the obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties. Provisions are not discounted to their value at current prices unless material.

When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year – where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant Directorate.

Where some or all of the payment required to settle a provision is expected to be recovered from another party (for example, from an insurance claim), this is only recognised as income for the relevant Directorate if it is virtually certain that reimbursement will be received if the Council settles the obligation.

Onerous Contracts -BCC policy not in code

An onerous contract is a contract for the exchange of assets or service in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits or service potential expected to be received under it.

Onerous Contracts are accounted for under IAS 37 – Provisions, Contingent Liabilities and Contingent Assets. A provision will be recognised for the unavoidable costs.

Provision for Back Pay Arising from Equal Pay Claims - slightly different from code and new section added for change in legislation.

The Council has made a provision for the costs of back pay arising from claims made under the Equal Pay Act 1970, as amended by the Equal Pay Act (Amendment) Regulations 2003. The Council bases the estimate of its provision on the expected costs of settlement for claims received up to the point of production of its financial statements.

The Council has received capitalisation directions to support an element of the provision made. However, statutory arrangements allow settlements to be financed from the General Fund and Housing Revenue Account in the year that the payments actually take place, not when the provision is established, for all claims made up to 1 April 2020. The additional provision made above the capitalisation directions given is, therefore, balanced by an Equal Pay Back Pay Account created from amounts credited to the General Fund and Housing Revenue Account balances in the year that the provision was made or modified. The balance on the Equal Pay Back Pay Account will be debited back to the General Fund and Housing Revenue Account balances through the Movement in Reserves Statement in future financial years as payments are made.

The ability to defer the reserves impact of new provisions ceased to be allowable from 1 April 2020. Liabilities, and changes in them, recognised before 1 April 2020 continue to be deferred until settlement. New equal pay liabilities recognised after 1 April 2020 will be accounted for in line with section 8 of the CIPFA code, and IAS37.

Contingent Liabilities

A contingent liability arises where an event has taken place that gives the Council a possible obligation that will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in Note 34 to the accounts.

Contingent Assets

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent assets are not recognised in the Balance Sheet but disclosed in Note XX to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

xxi. Reserves

The Council sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by transferring amounts out of the General Fund Balance. When expenditure to be financed from a reserve is incurred, it is charged to the appropriate Directorate in that year to score against the Surplus/Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then transferred back into the General Fund Balance so that there is no net charge against Council Tax for the expenditure.

Certain reserves are kept to manage the accounting processes for non-current assets, financial instruments, local taxation, retirement and employee benefits and do not represent usable resources for the Council – these reserves are explained in the relevant policies.

xxii. Council Tax and Business Rates

Billing authorities are required by statute to maintain a separate fund (the Collection Fund) for the collection and distribution of amounts due in respect of Council Tax and Business Rates. The Collection Fund's key features relevant to the accounting for Council Tax and Business Rates in the core financial statements are:

- In its capacity as a Billing Authority the Council acts as an agent, collecting and distributing Council Tax on behalf of the major preceptors and as principal for itself;
- While the Council Tax and Business Rates income for the year credited to the Collection Fund is the accrued income for the year, regulations determine when it should be released from the Collection Fund and transferred to the Council's General Fund, or paid out from the Collection Fund to the major preceptors. The amount credited to the General Fund under statute is the Council's demand on the Fund for that year, plus/(less) the Council's share of any surplus/(deficit) on the Collection Fund for the previous year. This amount may be more or less than the accrued income for the year in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2020/21.

Comprehensive Income and Expenditure Statement

The Council Tax and Business Rates income included in the Comprehensive Income and Expenditure Statement is the Council's share of accrued income for the year. The difference between the income included in the Comprehensive Income and Expenditure Statement and the amount required by regulation to be credited to the General Fund is taken to the Collection Fund Adjustment Account and included as a reconciling item in the Movement in Reserves Statement. In addition, that part of Business Rates retained as the cost of collection allowance under regulation is treated as the Council's income and appears in the Comprehensive and Income Expenditure Statement as are any costs added to Business Rates in respect of recovery action.

Balance Sheet

Since the collection of Council Tax and Business Rates are in substance agency arrangements, any year end balances relating to arrears, impairment allowances for doubtful debts, overpayment and prepayments are apportioned between the major preceptors and the Council by the creation of a debtor/creditor relationship. Similarly, the cash collected by the Council belongs proportionately to itself and the major preceptors. There will, therefore,

be a debtor/creditor position between the Council and the major preceptors since the cash paid to the latter in the year will not be equal to their share of the total cash collected. If the net cash paid to the major preceptors in the year is more than their proportionate share of the cash collected the Council will recognise a debit adjustment for the amount overpaid. Conversely, if the cash paid to the major preceptors in the year is less than their proportionate share of the amount collected then the Council will recognise a credit adjustment for the amount underpaid.

Cash Flow Statement

The Council's Cash Flow Statement includes in 'Operating Activities' cash flows only its own share of the Council Tax and Business Rates collected during the year, and the amount included for precepts paid excludes amounts paid to the major preceptors. In addition that part of Business Rates retained as the cost of collection allowance under regulation appears in the Council's Cash Flow Statement. The difference between the major preceptors' share of the cash collected and that paid to them as precepts and settlement of the previous year's surplus or deficit on the Collection Fund, is included as a net increase/decrease in cash and cash equivalents.

xxiii. Business Improvement Districts

In accordance with the provisions of the Business Improvement District Regulations (England) 2004 ballots of local businesses within specific areas of the City have resulted in the creation of distinct Business Improvement Districts. Business ratepayers in these areas pay a levy in addition to the Business Rate to fund a range of specified additional services which are provided by specific companies set up for the purpose.

In line with Code guidance the Council has determined that it acts as agent to the Business Improvement District authorities and therefore neither the proceeds of the levy nor the payment to the Business Improvement District Company are shown in the Council's accounts.

xxiv. Community Infrastructure Levy

The Council has elected to charge a Community Infrastructure Levy (CIL). The levy will be charged on new builds with appropriate planning consent. The Council charges for and collects the levy, which is a planning charge. The income from the levy will be used to fund infrastructure projects to support the development of the City.

CIL is received without outstanding conditions; it is, therefore, recognised at the commencement date of the chargeable development in the Comprehensive Income and Expenditure Statement in accordance with section ix. Government Grants and Contributions of this note. CIL charges will be largely used to fund capital expenditure although an element may be used to support infrastructure maintenance and a small proportion of the charges may be used to fund the costs of administration associated with the CIL.

xxv. Events After the Reporting Period

Events after the Balance Sheet date are those material events, both favourable and adverse, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- Those that provide evidence of conditions that existed at the end of the reporting period – the Statement of Accounts is adjusted to reflect such events;
- Those that are indicative of conditions that arose after the reporting period – the Statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of Audit Committee adoption of the accounts are not reflected in the Statement of Accounts.

xxvi. Joint Operations and Jointly Controlled Assets

Joint operations are activities undertaken by the Council in conjunction with other ventures that involve the use of the assets and resources of the venturers rather than the establishment of a separate entity. The Council recognises on its Balance Sheet the assets it controls and the liabilities it incurs, and debits and credits the Comprehensive Income and Expenditure Statement with the expenditure it incurs and the share of income it earns from the activity of the operation.

Jointly controlled assets are items of property, plant or equipment that are jointly controlled by the Council and other venturers, with the assets being used to obtain benefits for the venturers. The joint venture does not involve the establishment of a separate entity. The Council accounts for only its share of the jointly controlled assets, the liabilities and the expenses that it incurs on its own behalf or jointly with others in respect of its interest in the joint venture and income that it earns from the venture.

xxvii. Council Acting as Agent

The Council does not include transactions that relate to its role in acting as an agent on behalf of other bodies. In such cases the Council is acting as an intermediary and does not have exposure to significant risks and rewards from the activities being undertaken.

xxviii. Value Added Tax

Value Added Tax payable is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs. Value Added Tax receivable is excluded from income.

xxix. Foreign Currency Translation

Where the Council has entered into a transaction denominated in a foreign currency, the transaction is converted into sterling at the exchange rate applicable on the date the transaction was effected. Where amounts in foreign currency are outstanding at the year-

end, they are reconverted at the spot exchange rate at 31 March. Resulting gains or losses are recognised in the Financing Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

xxx. Dedicated School Grants Deficit Balances

Where the Council has a deficit in respect of its schools budget for a financial year beginning on 1st April 2020, the authority does not charge to a revenue account an amount in respect of that deficit. Instead, it charges the amount of the deficit to an account established, charged and used solely for the purpose of recognising deficits in respect of its schools budget

These financial statements continue to be produced under IFRS with the DSG being accounted for in the normal way (through the CIES). An accounting adjustment is made via the MiRS to move any DSG deficit balances on a time limited basis to an unusable reserve established for that purpose.
