

SEN2 (2021) Form

Census date: 14 January 2021

Overview

The information collected via the annual SEN2 survey form provides the major source of data collected on children and young people with Education, Health and Care (EHC) plans. It is the only source of data on the totality of EHC plans maintained by individual local authorities. Without this information it would be very difficult for Ministers, Parliament, central and local government, external organisations and the public at large to monitor government policies and their effectiveness, and to see how many children and young people with EHC plans there are in individual local authorities.
