

## Appendix O – Social Value Events

### Western Road Junction Phase 1 - Orion Training and St Patrick's RC School

McPhillips (Wellington) Ltd is a certified signatory to the BBC4SR and is providing actions proportionate to the value of the contract. These actions include employment opportunities which are monitored and managed during the contract period. A series of social value events with local stakeholder organisations have already been undertaken as part of the Western Road Junction Phase 1 works. This has included co-ordinating a competition for pupils to design a new ornamental bench with St Patrick's RC School and undertaking a plant/mechanic session with Orion Training School in November 2021. Both events were considered a major success with future additional events planned as part of the wider Revised Main Scheme delivery.

Summary of the Orion Training Event by McPhillips (Wellington) Ltd's community liaison officer (Thursday 4 November 21):

Morning all.....

*I did a social values dumper day activity yesterday 4/11/2021 at our A457 Dudley road works... So Just a quick message to say thankyou to all the kids at western garage Orion on Dudley road who took part. They were really good kids and enjoyed all the activities that we presented to them. We also did a little question activity which they also enjoyed. But the main 2 highlights of the day were when they actually had chance to sit on the dumper.....They loved it..... but most of all they were really impressed with Keith our plant breakdown mechanics van ...*

*They could not believe all the stuff he has to carry.....So a big thanks to Keith for keeping them entertained for the afternoon.....The day was such a success they now want me to do a 120 roller day*

*Once again thankyou everyone that was involved*
