Joint Strategic Needs Assessment		
Joint Commissioning and Service Integration		X
Maximising transfer of Public Health functions		
Financial		
Patient and Public Involvement		X
Early Intervention		X
Prevention		X

3. Recommendations

That the Health and Wellbeing Board notes the progress made against the CQC Local System Review Action Plan.

4. Background

- 4.1 The Action Plan was produced in response to the recommendations made by CQC following their Local System Review in January 2018 and has been in place since June 2018.
- 4.2 On the whole progress is on track against the timescales set within the Action Plan, with some actions already complete. In some instances there will be slippage, though it should be noted that DoH did consider some of our timescales to be ambitious.
- 4.3 For the most part fall under the Birmingham Ageing Well Programme and are being progressed via the 3 workstreams: Prevention, Early Intervention and Ongoing Personalised support. These groups report directly to the Birmingham Older Person's Partnership Board.
- 4.4 Progress against the actions under the 3 workstreams:
- Prevention:
- The Public Health Annual Report is being progressed and due to be published in November
 - The Health & Wellbeing Operations Group has created new subgroups

around Older People and Children and Young People. These groups include various stakeholders to inform the direction of the JSNA.

Early Intervention:

- Following the approval by Cabinet of the Business Case for external support for a locality based enablement pilot, a preferred partner has been selected and work is being progressed towards awarding the contract.
- System preparation has commenced including progressing a data sharing agreement and identifying an operational lead to work alongside the external support.
- The timescales will be slightly delayed by the process of awarding the contract.

Ongoing Personalised Support:

- There has been significant progress around the neighbourhood working model with two workshops being held in September
- The work is being progressed against 3 agreed mandates:
 - Developing an agreed shared vision and principles for the model
 - Defining what we mean by 'place' and ensuring any model we adopt is relevant for Birmingham
 - Structuring the city into neighbourhoods of 30 to 50k populations around which services will be delivered.

5. Future development

Delivery against the action plan will continue. Actions are currently scheduled up to June 2020.

6. Compliance Issues

6.1 Strategy Implications

Actions contained within the Action Plan are being integrated into the Birmingham Ageing Well Programme. This programme delivers the multi-agency response in Birmingham on the STP strategic priority of ageing better and later life.

6.2 Governance & Delivery

Delivery of the actions will be via the Ageing Well Programme. Accountable to the Health and Wellbeing Board with monthly progress updates to the Board.

6.3 Management Responsibility

As Senior Responsible Officer for the Local System Review, Graeme Betts is accountable for delivery of the Action Plan and reporting progress to DoH and Health and Wellbeing Board.

7. Risk Analysis

The approach towards risk is being addressed within the individual workstreams. As a priority workstream, Early Intervention is most developed in this respect.
