

Individual Library and Catchment Area Profiles

Birmingham Community Libraries 2016

Version 4

Library and Catchment Area Profiles

The Profiles for each library were prepared using catchment area data to enable detailed analysis of the characteristics of each area. As libraries often draw their users from across ward boundaries, the catchment areas were created by including any Lower Super Output Areas (LSOAs) where a defined percentage of the resident population (3%) used the library service in 2015/16.

Output Areas (OA) are created for Census Data, specifically for the output of census estimates. The OA is the lowest geographical level at which census estimates are provided. Lower and middle super output areas were designed to improve the reporting of small statistics and are built up from groups of output areas.

To create the catchment area definition we needed enough LSOAs to be generated to enable meaningful demographic data to be used. Each LSOA has an average of 1700 residents and 650 households. Measures of proximity (to give a reasonably compact shape) and social homogeneity (to encourage areas of similar social background) are also included.

The Profiles give detailed demographic information, economic activity, educational attainment as well as identifying the Index of Multiple Deprivation score (IMD). Local bus and rail stops are included, in addition individual library performance data collected from the library management system, Spydus.

Population: 1, 2 and 3 - Population in catchment area based on Mid-2014 Population Estimates, ONS

4 - Based on library members (can be a member of any library) who live in the library catchment area and have actively used that library during 2015/16

Library	Total Resident Population (1)	Resident Population age 0-19 (2)	Resident Population age 65+ (3)	Number of LSOAs in catchment (4)
Acocks Green Library	31,171	9,377	3,736	18
Aston Library	17,314	6,400	1,493	8

A black and white photograph of a multi-story building, likely a school or institutional structure. The building features a prominent entrance with a large, dark, rectangular sign above the doorway. The sign has some text, but it is difficult to read. The building has several windows and a flat roof. The photograph is oriented vertically, with the building's facade running from top to bottom.
