

# COVID-19 Vaccination Overview

Data extracted on 23/11/2021

**Making a positive difference** every day to people's lives

# Vaccine Roll Out

- COVID-19 vaccine boosters are being offered across the country to the over-50s, younger adults with health conditions, care home residents, frontline health and care workers, adult household contacts of immunosuppressed individuals, 16-49 years old with underlying conditions that put them at higher risk of severe COVID-19 and adult carers. Pregnant women who are in one of the eligible groups can also get a booster.
- The booster vaccine roll-out has been extended to the over-40s (6 months after their second dose). The current uptake of the booster vaccines in Birmingham is 63.5%.
- The 16-17 years old can also receive their vaccines through Walk-in sites which are available at locations across Birmingham.
- All children aged 12-15 years old are being offered their vaccine either at school or out of school through the national booking service (online booking or via 119).
- Figures from the [GOV.UK](https://www.gov.uk) website indicate that 88.1% of England people aged 12\* years and over have had their 1st vaccine dose, and 80.0% their 2nd dose. This compares to 65.3% and 57.4% in Birmingham. The vaccination roll-out in the 12-15 age group will impact the overall uptake figures, compared to uptake at age 16+.

# Vaccine Guidance Update

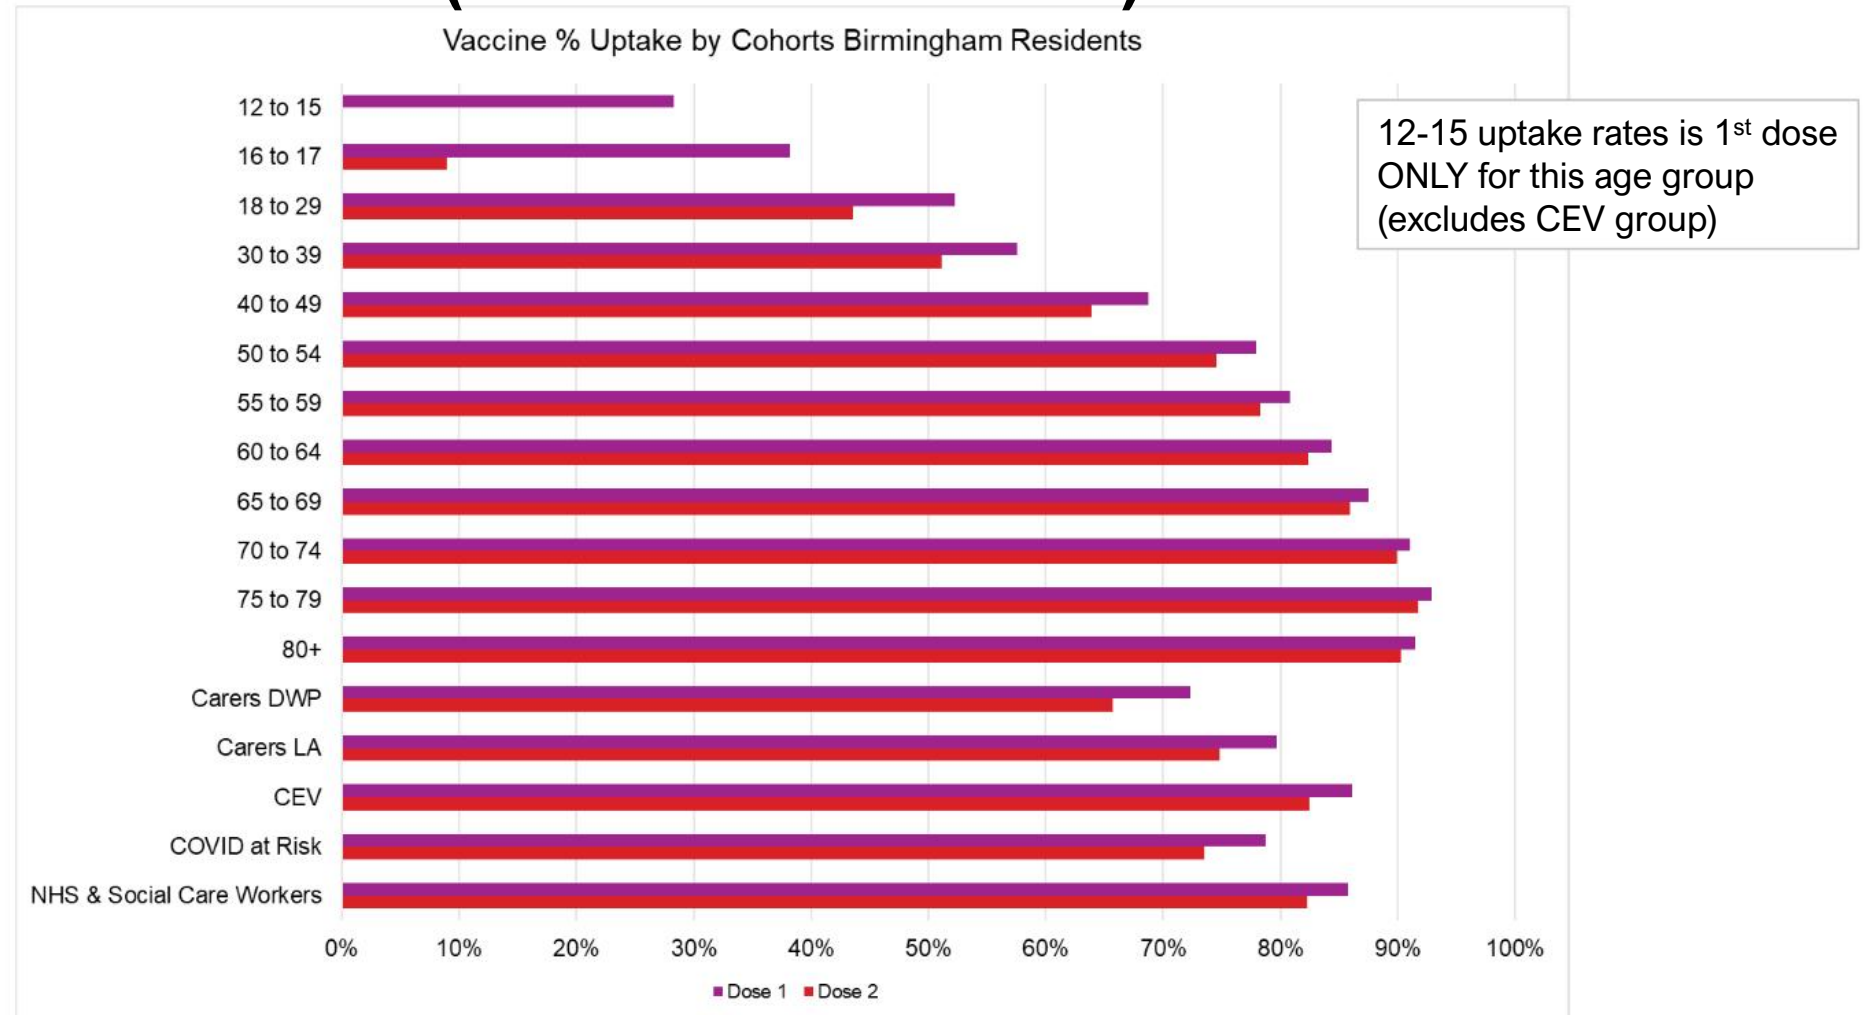

The UK Health Security Agency (UKHSA) UKHSA recommends that:

- Those aged 18 and above should still take up their vaccine offer, if they are 4 weeks post a positive Covid-19 test. This is because they are at higher risk of the complications of COVID-19 infection.
- Young people aged 16 to 17 who have had COVID-19 infection, should be given the second vaccine dose 12 weeks or more after the first dose, or 12 weeks following a positive COVID-19 test result – whichever is later.
- Those aged 12 to 17 and not in a high-risk group should wait 12 weeks after a positive COVID test before getting their first (or second if aged 16 to 17) vaccine dose. This is to reduce the small risk of myocarditis in the younger age groups.
- This change does not affect those aged 12 to 17 in clinical at-risk groups. These individuals should still take up their vaccine offer if they are 4 weeks post a positive test and then continue to receive their second dose 8 weeks after the first. This is because their individual risk of severe outcomes from COVID-19 is higher and so outweighs any benefit of delaying to 12 weeks.

# Uptake by Date of Vaccination (updated 23/11/2021)

Uptake\* of 1<sup>st</sup> dose has slowed since the end of June, whilst uptake of 2<sup>nd</sup> dose slowed in mid-August. The current rate of uptake for the 1<sup>st</sup> and 2<sup>nd</sup> doses in Birmingham residents aged 12 years and over (65.3%, 57.4%) is lower than the rates for West Midlands (77.9%, 70.9%) and England (88.1%, 80.0%).

\*The vaccination roll-out in the 12-15 age group would also likely impact the overall uptake figures, compared to uptake at age 16+.
