It brings together three life course themes, alongside action on wider determinants, health protection and environmental public health.

The framework will include ambitions and indicators that will consider needs and action across the life course, as well as the cross-cutting approach: Equality, Diversity and Inclusion.

## Socio-economic impacts

None for the consultation.

The proposed "Creating a Healthier City Framework" will ensure partners collaborate to create environments that enable healthier lives, approaches to employment and education support people to achieve their potential, and communities support people together in positive and productive ways that improve their health.

Supporting our citizens to live healthier lives has the potential to positively impact socio-economic outcomes for individuals and the population. The framework also considers the wider determinants of health, which significantly contribute to health and disease outcomes.

Please indicate any actions arising from completing this screening exercise.	To continue with the consultation to assess and understand the impact of the "Creating a Healthier City Framework" on the protected characteristics.
Please indicate whether a full impact assessment is recommended	NO
What data has been collected to facilitate the assessment of this policy/proposal?	
Consultation analysis	
Adverse impact on any people with protected characteristics.	
Could the policy/proposal be modified to reduce or eliminate any adverse impact?	
How will the effect(s) of this policy/proposal on equality be monitored?	
What data is required in the future?	
Are there any adverse impacts on any particular group(s)	No
If yes, please explain your reasons for going ahead.	
Initial equality impact assessment of your proposal

Summary and evidence of findings from your EIA	<p>The Creating a Healthier City Framework is focused on prevention and reducing inequalities for those already living with chronic ill-health. It will achieve this by focusing on shaping a healthier environment of opportunity for citizens to access affordable, sustainable, and environmentally positive healthy lives.</p> <p>The framework and associated public consultation do not impact negatively the nine protected characteristics. However, it will consider them as part of the ambitions, indicators and actions to improve health outcomes throughout the life course. It contains cross-cutting approaches to the life course and 5 themes. One of these approaches is Equality, Diversity and Inclusion.</p> <p>A public consultation is planned to understand both public and specialist views on the framework, including the ambitions and indicators of the 5 themes, the life course and the cross-cutting approaches.</p> <p>The five themes are:</p>

1. Healthy and Affordable Food
2. Mental Wellness and Balance
3. Active at Every Age and Ability
4. Contributing to a Green and Sustainable Future
5. Protect and Detect

The life course consists of:

1. Getting the Best Start in Life
2. Working Well
3. Ageing and Dying Well

The cross-cutting approaches are:

1. Mitigate the Legacy of Covid
2. Equality, Diversity and Inclusion

Throughout the Health and Wellbeing Board partnership and the framework, there is a focus on reducing health inequalities. Under each theme of action, there is work to address specific inequalities, called 'Closing the Gap'.

#### QUALITY CONTORL SECTION

Submit to the Quality Control Officer for reviewing?

No

Quality Control Officer comments
